NuEnergy
Developments
Accent on Ability

Our Areas of Interest

Developing a balanced and sustainable energy portfolio for Southern Africa's growth and prosperity

Growing our energy industry through industrial ingenuity, advanced technologies and global competences

Optimisation of local industry content in complex energy infrastructures

Renewable – Hydro – Gas – Coal – Nuclear Energy

“Access to clean, reliable and affordable energy” – World Energy Council

Our Fields of Operation

Southern African Energy Advisory Services

- Energy sector intelligence and orientation
- Local industry positioning and alignment
- Strategic planning and leadership support
- International partnering and specialist support
- Access to local and global energy stakeholders

Project Developments and Support

- Project conceptualisation and planning
- Project viability and feasibility studies
- Project stakeholder coordination
- Digital Transformation advisory and support

Complex Energy Projects

- Organisational assessment and structuring
- Safety-Class Quality Management Systems
- Resource development and mobilisation support
- Strategic industry partnerships and alignments
- Specialist training and mentoring programs

Specialized Industrial Resources

NuEnergy has a wealth of experience in the development, coordination and delivery of large-scale energy projects, where we are aligned with local and international energy companies, professionals and specialists. We source top quality engineering, manufacturing, material supply and construction capabilities for complex energy projects, which includes regulatory, legal and financial advisory services.

Supporting Industry Readiness in Southern Africa

Driving a balanced and sustainable energy portfolio for Southern Africa

Let's get our industry back to work!
